obtaille Normal School, was called on and delivered a short but very pertinent al pointed talk on the subject, "What Tey Do in Rural District Schools."

The discussion of this subject occupied the entire foremoon session, and was very lively at times. So much interest was mandested that the discussion was post-posed to be brought up again some time daring the session.

1.0. Ralphender was appointed enroll-ing derk.

The choir sang "Only an Armor Bearer." Hon Charles James Faulkner was intro-daced by the chairman and delivered a tery able address on the subject, "The Education of the Masses." The courtnorm was crowded to hear the gentleman's eloquent address. It was an address that all should hear, showing the great necessity for the education of all the masses in order by insure the preservation of a free Nation.
Mr. Faulkner surely retains the eloquence and fire of his earlier days. At the close,

A. L. Purinton, Superintendent of the A. L. Purinton, Superintendent of the Parkersburg schools, opened the discussion on the subject of "Teachers' Salaries." His remarks were very humorous and enlivened the addience not a little. The subject was father discussed by Profs. Wade, Hodges, Oscand Hawthorne. The general opinion as expressed was that the teachers were poolly paid, and that both teachers and the people were to blame for this. It was resolved to have better schools in the lature and hope for better pay.

across the water. Then there was an anxious pause. Would the Egyptians answer or would they evacuate the forts? No teries opposite we could see men loading given to commence independent firing salvo from five nine-inch guns went from the side of the Invincible, while overhead ten Nordenfeldt guns in the tops swelled the sade of the invincible, while overhead ten Nordenfeldt guns in the tops swelled the din which burst from all the ships. The bank of smoke which at once rose like a wall from our side prevented me from seeing the results of our fire. Out from the tops it was seen that the shells had struck rather low, and sights were raised from 1,550 to 1,500 yards. The Monarch and Penelope had hoth work close at hand, and the roar of their heavy guns and the ceaseless rattle of their Gatings and Nordenfeldt machines, and the rush of rockets which the Monarch was discharging, added to the sound of our own guns, made up a deep continuous din which is impossible to describe, and was most bewildering to hear. In any momentary interval the sound of guns from the other division of the fleet, told that they also were hard at work. The smoke from the very commencement of the engagement was so dense that we could see nothing of the effect which our fire was producing nor of what the enemy were doing. But soon after we began a share scream overhead.

SHARP SCREAM OVERHEAD. of spray to the seaward as the shots struck plying to our cannon. Soon orders were sometime before the veil was lifted sufficiently for even a glimpse of the shore seen from the deck. Hardy, a midship man, posted in the main top, signaled the direction of the shells and the accuracy of fire improved; in the meantime the enemy's shots were coming thick and fast.
Twenty minutes after the first gun our the other mill owners would give in because the market was growing healthier, the demand for iron was more brisk and manufacturers were beginning to think that the employees were determined. In conclusion Mr. Jarrett said he would remain in the city until about the 1st of August.

Citicxoo, July 12.—The strike at the Iron and Steel Co, was brought to a close late this afternoon by the company signing scales

questions of me as to what could be seen above. The enemy were continually site ing to their guns manfully, although amid the hail of heavy shells and Gatling and Nordenfeldt bullets. It must have been hot indeed inside the forts. But luckily for us, their fire although good in direction was bad in elevation, and we were seldom hit.

By So'clock the Monarch had silence By 80 clock the Monarch had silenced the small fort opposed to her and set fire to the buildings and dismounted the guns, and she now joined us against the formidable works of Fort Mex. The Exppitans in that battery still replied briskly, but although several times struck, none of the shots penetrated our battery or water or water line, but where no armor protected her the shot scattered showers of splinters through the ship. One shot struck the quarter deck close to Lieut. Lambleton. By 90 clock our fire had silenced all guns in Fort Mex, with the exception of four heavs rifled guns, the sound of whose conical shot was easily distinguished.

## MADE IT HOT FOR THEM.

These four guns gave us great trouble they were all under cover and the gunner stuck well to their work. The Temeraire was therefore signalled to come to the as sistance of three ships engaged. It was difficult to hit the exact locality of the guns seen as they were dimly and occasionally only three maintained fire. These gun-were concentrated on the Invincible and must have been worked by the best gunners, for they struck us every time, often quite on the water line. Before they were silenced we had six men wounded, one with a foot taken off by round shot, others by splinters. By 11 o'clock the fort was in ruins with the guns all silenced. The Monarch was signalled to go close to shore and dismantle the fort 'thoroughly at close quarters. An hour earlier, Fort Marabout lying two miles away had opened fire upon the ships engaged with Fort Mex. The shots fell short and we took no notice of the attack, but Lord Charles Beresford, commanding the gunboat Condor stood in and pluckily engaged the fort with his little craft. The gunboat Beacon came on and joined him making excellent practice on on the fort, whose shots fell thick round the boats and passed several times between the masts but never touched them. Its hre at last was silenced by the placky little gunboats. Meantime the ships of other divisions of the squadron steadily engaged forts Pharos, Ras-El-Tin and Ada, the In-flexible having gone to ald the Sultan, Su-perb and Alexandria with her fire. The Egyptian batteries steadily replied and rapidly. The roar of guns was almost con-tinuous, while the rush of heavy projectiles

through the air resembled the low rumble of distant thunder. Fort Pharos early of negotiations. It is supposed the Egypshowed signs of heavy battering to which tit was exposed. One of the towers was knocked down and the fort soon ceased firing altogether, while the fire from the calles fortal large properties.

On Board H. M. S. Invincinle, Alexandria, July 11, 7 r. M. J. The great artillery contest which has raged all day, ended in a complete success. At half past 10 the Khedive's palace. with a surprisingly small loss of life, the total of the casualties in the fleet being five killed and twenty-seven wounded. It is difficult, so soon after the engagement, to write a cool and collected narrative of the day. The dead calm which has succeeded the tremendous roar of artillery which has gone on for so many hours seems strange and unnatural. I can scarcely realize that the first great sea fight with artillery of modern size has been fought and won.

The Bittern after taking the flag of Lie ambton on board proceeded to the hared. Harr, of Atlanta, president, delivered the inaugural. He said he was a Southerner by birth, education and sentiment, and he felt that he truly represented the bulk of people as well as the educated classes, when he said, "Let by gones be by gones. L t the dead bury the redead, and iet what has been stand, we will busy ourselves with the present, which is living." These are the sentiments of the bet men of the South, and certainly the people of all sections of the country will heartily respond. The whole address was in this spirit and was very cordially received. Prof Eli T. Tappin, of Kenyon Collego, Gambier, read a paper on "The University—Its Place and Work in the American System of Education."
